SETTLEXPERT CRM — COMPLETE REVERSE ENGINEERING, AUDIT & NEW CRM REBUILD SPECIFICATION

Document Type: Master Reverse-Engineering Technical Specification, Functional Audit & Rebuild Blueprint

Target Project: SettleXpert CRM (`settl-expert-admin` v1.0.0)

Audit Date: October 2026

Author: Antigravity AI Systems Architect & Reverse Engineering Team

Status: Final Master Blueprint (No Code Changes — Pure Extraction & Audit)

Scope Version: Production Rebuild Standard v2.0

---

01. Executive Summary

The **SettleXpert CRM** is an integrated operational platform tailored for the Indian legal and debt settlement ecosystem. It administers the entire lifecycle of distressed retail borrowers seeking relief from banking harassment, structured loan restructuring, Section 138 Negotiable Instruments Act defense, and one-time settlement (OTS) with lending institutions.

Canonical Business Pipeline

```
LEAD (Inquiry Acquisition & Qualification)
  ↓ [Deduplication, Telecalling & Follow-ups]
CLIENT (Converted Entity & 360° Financial Profile)
  ↓ [Annexure A Creditor Enrollment & Fee Plan]
AGREEMENT (Legal Retainer Execution: AGR-XXXX)
  ↓ [Installment Plan & Payment Proof Submission]
PENDING VERIFICATION (Manager / Finance Audit Queue)
  ↓ [Verify & Approve (UTR & Receipt Match)]
VERIFIED PAYMENT & ACTIVE CASE DEFENSE
  ↓ [Anti-Harassment Notices & Settlement Negotiations]
CASE CLOSURE & NO DUE CERTIFICATE (NDC)
```

Primary System Invariants

1. **Single Source of Truth:** The transition from Lead to Client is strictly unidirectional and atomic. Lead information is never re-entered; it migrates programmatically via `POST /api/crm/leads/:id/convert`.
2. **Zero Razorpay Dependency:** The operational payment flow relies entirely on manual payment submissions (NEFT/RTGS/IMPS/UPI) accompanied by transaction UTRs and screenshot proofs. Razorpay is deprecated and excluded from the core rebuild.
3. **Manager & Finance Gatekeeping:** Telecalling agents and sales employees are strictly barred from self-verifying payments. Verification requires a dual-state audit queue with mandatory rejection reasons.
4. **Isolated Legal Track:** The Advocate Legal Portal operates in tandem with the Client record, providing formal legal representation, anti-harassment notice dispatch, and demand notice tracking.

---

02. Project Scope

In-Scope (Core Rebuild Architecture)

- **Authentication & Security:** JWT-based session security, account lockout, and role authorization.
- **Role Hierarchy:** Dedicated workspaces for Admin, Manager, Employee, Finance, and Advocate.
- **Lead Management:** Multi-channel acquisition, deduplication, auto/manual assignment, follow-up scheduling, and conversion.
- **Client Management & 360° Profile:** Comprehensive client ledger, debt portfolio, bank accounts, and 19 integrated operational sub-tabs.
- **Agreements Engine:** Dynamic 12-clause legal contract generation, multi-lender Annexure A schedules, and execution logs.
- **Manual Payment & Verification Desk:** Proof attachment, UTR audit, manager verification, atomic balance updates, and finance ledger.
- **Advocate Portal & Legal Defense:** Case allocation, anti-harassment legal notices, Section 138 defense, and speed post dispatch tracking.

- **Reports & Auditing:** Executive KPIs, calling analytics, collection totals, and immutable audit logs.

Out-of-Scope / Isolated Items

- **Razorpay Integration:** All Razorpay SDKs, webhooks, checkout scripts, and order IDs are categorized as `REMOVED` and excluded.
- **Operations (OPS) Department:** Existing operations screens and task dispatchers are documented under `LEGACY / EXISTING OPERATIONS FUNCTIONALITY` and are not part of the core CRM workflow unless explicitly activated.
- **Prototype Backends:** Legacy PHP files in `php-app/` and `backend/` are strictly isolated from the Node.js/Express production runtime.

---

03. Existing Technology Stack

Runtime Environment & Architecture

- **Frontend Architecture:** Single Page Application (SPA) built on React 19.2.8 with TypeScript 7.0.2, bundled via Vite 8.2.2.
- **UI Framework & Design System:** Tailwind CSS 3.4.17 with PostCSS 8.5.26, Lucide React (v1.33.0) for icon typography, `clsx`, and `tailwind-merge`.
- **Backend Architecture:** Node.js (CommonJS) running Express.js 5.2.1, Morgan request logging, Cross-Origin Resource Sharing (CORS), and `dotenv` configuration.
- **Database Architecture (Dual Synchronization Engine):**
- *Local High-Performance Store:* SQLite 3 using `better-sqlite3` v13.0.3 (`server/data/settlexpert.db`).
- *Cloud Production Store:* Supabase PostgreSQL via `@supabase/supabase-js` v2.112.4.
- *Data Sync Layer:* `server/db/syncQueue.js` with push/pull delta replication.
- **Authentication & Cryptography:** JSON Web Tokens (`jsonwebtoken` v9.0.3), password encryption via `bcryptjs` v3.0.3.
- **Data Interchange & Document Processing:** SheetJS (`xlsx` v0.18.5) for Excel lead parsing and export, `uuid` v14.0.2 for distributed transaction identifiers.

---

04. New CRM Target Scope

The target CRM rebuild must discard the dual-engine sync layer and obsolete prototype files in favor of a clean, high-concurrency production architecture:

1. **Frontend:** React 19 / Next.js / Vite SPA with strict TypeScript typing, Tailwind CSS, and headless UI primitives.
2. **Backend:** Clean RESTful or tRPC micro-service / modular monolith built on Express or NestJS.
3. **Database:** Native PostgreSQL 16+ (Supabase or AWS RDS) with foreign key constraints, connection pooling, and row-level security (RLS).
4. **File Storage:** S3-compatible cloud storage (AWS S3, Cloudflare R2, or Supabase Storage) for payment proofs and legal notices.
5. **No Razorpay:** Clean manual payment entry desk with receipt generator and UTR verification queue.
6. **No Phantom Ops:** The core scope contains Leads, Clients, Agreements, Payments, Finance, Legal Advocates, and Reports.

---

05. Role Architecture

The CRM enforces 5 distinct roles. Each role maps to a dedicated workspace, specific navigation rules, and backend authorization middleware:

Role Identifier	Role Title	Functional Scope	Primary Workspace
`admin`	Super Administrator	Full platform control, staff KYC, team creation, permissions matrix, fee plans, full ledger, security audits.	`AdminDashboard.tsx`
`manager`	Operations / Sales Manager	Lead quota distribution, calling audits, staff oversight, payment approval/rejection desk, escalation reviews.	`ManagerWorkspace.tsx`
`employee`	Sales & Telecaller	Lead acquisition, outbound calling, follow-ups, lead qualification, client conversion, manual payment submission.	`EmployeeWorkspace.tsx`
`finance`	Finance Controller	Dedicated ledger audit, fee verification, reconciliation of manual receipts, collection analytics.	`PaymentsView.tsx`
`advocate`	Legal Counsel	Client legal profile inspection, anti-harassment notice generation, Section 138 defense, demand notice tracking.	`AdvocateWorkspace.tsx`

---

06. Complete Module Inventory

The existing CRM contains 28 distinct functional modules across frontend and backend:

1. **Authentication & Session Security** (`/login` , `/me`)
2. **Executive Admin Dashboard** (`/dashboard`)
3. **Staff Directory & KYC Management** (`/organization/staff-directory`)
4. **Managers Management** (`/organization/managers`)
5. **Employees Management** (`/organization/employees`)
6. **Departments Management** (`/organization/departments`)
7. **Teams Management** (`/organization/teams`)
8. **Manager Types & Classifications** (`/organization/manager-types`)
9. **Roles & Granular Permissions Matrix** (`/organization/roles-permissions`)
10. **Leads Pipeline & Calling Desk** (`/crm/leads`)
11. **Lead Import & Smart Distribution Engine** (`/crm/lead-import-distribution`)
12. **Clients Directory & Master Ledger** (`/crm/clients`)
13. **Client 360° Unified Workspace (19 Integrated Sub-Tabs)**
14. **Client Onboarding Form Engine** (`/crm/onboarding-form`)
15. **Agreements & Contracts Engine** (`/crm/agreements`)
16. **Advocates Directory & Empanelment** (`/advocates`)
17. **Advocate Legal Portal & Case Management** (`/advocate-portal`)
18. **Legal Notices Engine (Anti-Harassment & Sec 138)** (`/advocate-portal/legal-notices`)
19. **Demand Notices Engine** (`/advocate-portal/demand-notices`)
20. **Finance & Payment Verification Desk** (`/finance/payments`)
21. **Master Fee Plans** (`/finance/fee-plans`)
22. **Operations & Cross-Functional Tasks** (`/operations/tasks` — Legacy)
23. **Follow-Ups Master Calendar** (`/operations/follow-ups` — Legacy)
24. **Document Repository Locker** (`/operations/documents` — Legacy)
25. **Escalations & Grievance Desk** (`/operations/escalations` — Legacy)
26. **Reports & Executive Analytics** (`/reports`)
27. **Security & Audit Logs Trail** (`/audit`)
28. **Admin Platform Settings** (`/settings`)

07. Complete Page Inventory

Page ID	Page Name	Route / Nav Key	Component Source Path	Role Access	Classification
PG-01	Login Screen	`/`	`src/components/auth/LoginView.tsx`	All Users	CONFIRMED
PG-02	Admin Master Dashboard	`dashboard`	`src/components/dashboard/AdminDashboard.tsx`	Admin	CONFIRMED
PG-03	Staff Directory & KYC	`staff-directory`	`src/components/staff/StaffDirectory.tsx`	Admin	CONFIRMED
PG-04	Managers Management	`managers`	`src/components/organization/ManagersView.tsx`	Admin	CONFIRMED
PG-05	Employees Management	`employees`	`src/components/organization/EmployeesView.tsx`	Admin	CONFIRMED
PG-06	Departments Management	`departments`	`src/components/organization/DepartmentsView.tsx`	Admin	CONFIRMED
PG-07	Teams Management	`teams`	`src/components/organization/TeamsView.tsx`	Admin	CONFIRMED
PG-08	Manager Types	`manager-types`	`src/components/organization/ManagerTypesView.tsx`	Admin	CONFIRMED

PG-27	Manager Workspace Hub	(Role Root)	`src/components/manager/ManagerWorkspace.tsx`	Manager	CONFIRMED
PG-28	Manager Payment Verification Desk	`manager/payment-verification`	`src/components/manager/ManagerPaymentsVerificationView.tsx`	Manager, Finance	CONFIRMED
PG-29	Operations Task Workspace	`operations`	`src/components/operations/OperationsWorkspace.tsx`	Admin, Ops (Legacy)	LEGACY
PG-30	Platform Settings & Security	`settings`	`src/components/settings/SettingsView.tsx`	Admin	CONFIRMED
PG-31	Reports & Executive Analytics	`reports`	`src/components/reports/ReportsView.tsx`	Admin	CONFIRMED
PG-32	Security & Audit Logs Desk	`audit`	`src/components/audit/AuditView.tsx`	Admin	CONFIRMED

08. Role-Wise Page Inventory

1. Super Admin Role (`admin`)

- **Dashboard:** `AdminDashboard.tsx` (KPI metrics, calling velocity, collections, financial highlights).
- **Organization Hierarchy:** `StaffDirectory.tsx`, `ManagersView.tsx`, `EmployeesView.tsx`, `DepartmentsView.tsx`, `TeamsView.tsx`, `ManagerTypesView.tsx`, `RolesPermissionsView.tsx`.
- **CRM Operations:** `LeadsView.tsx`, `LeadImportDistributionView.tsx`, `ClientsView.tsx`, `ClientDetailsUnifiedView.tsx`, `AgreementsView.tsx`.
- **Legal Oversight:** `AdvocatesView.tsx`, `AdvocateWorkspace.tsx`, `AdvocateLegalNoticesView.tsx`, `AdvocateDemandNoticesView.tsx`.
- **Financial Controls:** `PaymentsView.tsx`, `FeePlansView.tsx`.
- **Governance & Logs:** `ReportsView.tsx`, `AuditView.tsx`, `SettingsView.tsx`.

2. Operations / Sales Manager Role (`manager`)

- **Manager Dashboard:** `ManagerDashboardView.tsx` (Team performance, lead distribution status).
- **Leads & Calling Desk:** `ManagerLeadsView.tsx`, `LeadImportDistributionView.tsx`.
- **Client Oversight:** `ManagerClientsView.tsx`, `ClientDetailsUnifiedView.tsx`.
- **Payment Verification:** `ManagerPaymentsVerificationView.tsx` (Approve/Reject manual payments).
- **Team Monitoring:** View assigned team members, call history, and follow-up metrics.

3. Employee / Telecalling Agent Role (`employee`)

- **Workspace Navigation:** `EmployeeWorkspace.tsx` with 3 specialized tabs:
- `leads`: `EmployeeLeadsView.tsx` (My assigned leads, quick calling, follow-up scheduling, status transitions).
- `clients`: `EmployeeClientsView.tsx` (My converted clients, debt details, payment submission modal).
- `agreements`: `EmployeeAgreementsView.tsx` (View executed agreements, download PDF contracts).
- **Client 360° Profile:** Access to client details via `ClientDetailsUnifiedView.tsx`.
- **Payment Submission:** Modal inside `EmployeeClientsView.tsx` to upload payment screenshots and enter UTR.

4. Finance Controller Role (`finance`)

- **Finance Payment Desk:** `PaymentsView.tsx` (All transactions across all clients).
- **Ledger Audit Queue:** `ManagerPaymentsVerificationView.tsx` (Filter by pending verification).
- **Fee Management:** `FeePlansView.tsx` (View and configure retainer plans).
- **Collection Analytics:** Access to revenue and collection cards inside `ReportsView.tsx`.

5. Advocate Role (`advocate`)

- **Advocate Workspace:** `AdvocateWorkspace.tsx` (Active case docket, assigned clients).
- **Legal Notices Desk:** `AdvocateLegalNoticesView.tsx` (Generate anti-harassment and Section 138 notices).
- **Demand Notices Desk:** `AdvocateDemandNoticesView.tsx` (Manage and dispatch demand notices `DN-XXXX`).

---

09. Navigation Architecture

Sidebar Structure (`src/components/common/Sidebar.tsx`)

The navigation is rendered dynamically based on `user.role`:

```
SettleXpert CRM
│
├── Dashboard (dashboard) ──────────────► [Admin]
│
├── Organization Hierarchy ─────────────► [Admin]
│   ├── Staff Directory (staff-directory)
│   ├── Managers (managers)
│   ├── Employees (employees)
│   ├── Departments (departments)
│   ├── Teams (teams)
│   ├── Manager Types (manager-types)
│   └── Roles & Permissions (roles-permissions)
│
├── CRM Pipeline ──────────────────────► [Admin, Manager]
│   ├── Leads Management (leads)
│   ├── Lead Import & Distribution (lead-import-distribution)
│   ├── Clients Directory (clients)
│   ├── Client Onboarding (onboarding-form)
│   └── Agreements (agreements)
│
├── Legal Advocacy ─────────────────────► [Admin, Advocate]
│   ├── Advocate Directory (advocates)
│   ├── Advocate Portal (advocate-portal)
│   ├── Legal Notices (legal-notices)
│   └── Demand Notices (demand-notices)
│
├── Finance & Accounts ─────────────────► [Admin, Finance]
│   ├── Payment Verification Desk (payments)
│   └── Master Fee Plans (fee-plans)
│
├── Operations Desk (Legacy) ───────────► [Admin, Ops]
│   └── Operations Hub (operations)
│
├── Analytics & Governance ─────────────► [Admin]
│   ├── Executive Reports (reports)
│   ├── Security Audit Logs (audit)
│   └── System Settings (settings)
```

10. Authentication & Security

Authentication Architecture

- **Login Endpoint:** `POST /api/auth/login` validates user credentials against `users` table.
- **Session Validation:** `GET /api/auth/me` verifies the `Authorization: Bearer` header on client load.
- **Token Generation:** Node.js generates signed JWT tokens containing `{ id, email, role, name, emp_or_mgr_id }` with a 24-hour expiration.
- **Password Security:** Salted hashing via `bcryptjs` with a work factor of 10. Passwords are never stored in plain text.
- **Brute-Force Lockout Defense:**
- Failed login attempts increment `failed_login_attempts`.
- After 5 consecutive failures, `locked_until` is set for 15 minutes.
- Successful authentication resets `failed_login_attempts` to 0.
- **Session Termination:** Client-side token purge via `localStorage.removeItem('token')`.

Request Authorization & Security Audit Trail

- **Middleware:** `server/routes/crm.js` and `server/routes/manager.js` verify roles via `requireAuth` and `requireRole(['admin', 'manager'])`.
- **Audit Logging:** Every critical mutation executes `logAudit(req, action, entity_type, entity_id, details)`, capturing user ID, IP address, and user-agent string.

11. Lead Module Specification

Lead Fields & Schema

Field Name	Display Label	Data Type	Required	Default	Validation / Constraint	Source Table Column
`id`	Lead ID	String	Yes	Auto (UUID)	Primary Key	`leads.id`
`lead_number`	Lead Number	String	Yes	Auto	Format: `LD-XXXX`	`leads.lead_number`
`name`	Client Name	String	Yes	-	Min 2 chars	`leads.name`
`phone`	Phone Number	String	Yes	-	10-digit mobile number	`leads.phone`

Field Name	Display Label	Data Type	Required	Default	Validation / Constraint	Source Table Column
`email`	Email Address	String	No	-	Valid email syntax	`leads.email`
`loan_amount`	Total Debt	Decimal	No	0.00	Positive numeric	`leads.loan_amount`
`city`	City	String	No	-	City name	`leads.city`
`state`	State	String	No	-	Indian state	`leads.state`
`status`	Pipeline Stage	Enum	Yes	`New`	6 Allowed Statuses	`leads.status`
`source`	Acquisition Source	String	No	`Manual`	Inbound, FB, Website, etc.	`leads.source`
`notes`	Initial Remarks	Text	No	-	Free text	`leads.notes`
`assigned_to`	Assigned Agent	UUID	No	NULL	FK to `users.id`	`leads.assigned_to`
`manager_id`	Assigned Manager	UUID	No	NULL	FK to `users.id`	`leads.manager_id`

Lead Status Pipeline (6 Confirmed Statuses)

1. `New`: Raw uncontacted lead entered via manual submission or bulk Excel import.
2. `Assigned`: Lead routed to an employee or manager queue for initial outreach.
3. `In Progress`: Active outbound telecalling underway; call attempts and follow-ups scheduled.
4. `Hot Lead`: Distressed borrower confirmed eligible; debt portfolio qualified; negotiation started.
5. `Converted`: Client onboarded; lead marked converted; client record `CL-XXXX` created.
6. `Rejected`: Unqualified inquiry, non-responsive debtor, or fraudulent entry.

---

12. Lead-to-Client Conversion Engine

Execution Workflow (`POST /api/crm/leads/:id/convert`)

When an agent or manager triggers **Convert Lead**:

1. **Deduplication Check:** The backend queries `clients` for an existing record matching `lead_id = ?` or `phone = ?`. If found, conversion is blocked with `400 Duplicate Client`.
2. **Atomic ID Generation:** A unique client identifier `CL-` is generated using `clients_seq`.
3. **Field Migration:**
   - `leads.name` ➔ `clients.name`
   - `leads.phone` ➔ `clients.phone`
   - `leads.email` ➔ `clients.email`
   - `leads.city` ➔ `clients.city`
   - `leads.state` ➔ `clients.state`
   - `leads.loan_amount` ➔ `clients.total_debt`
   - `leads.assigned_to` ➔ `clients.assigned_to`
   - `leads.manager_id` ➔ `clients.manager_id`
4. **Initial Financial Balance:**
   - `agreed_fee` initialized based on standard fee schedule (default 10% of debt or ₹10,000 minimum).
   - `paid_amount` initialized to `0.00`.
   - `pending_amount` set equal to `agreed_fee`.
   - `fees_status` set to `'Pending'`.
5. **Lead Status Mutation:** Lead is updated to `status = 'Converted'` with `converted_at = CURRENT_TIMESTAMP`.
6. **Creditor Generation:** If lender details were noted in the lead, an initial record is created in `lenders`.
7. **Audit Trail:** Immutable record created in `audit_logs` documenting conversion details.

---

13. Client Module Specification

Client Data Architecture

Clients represent onboarded legal retainers. The client record holds:

- **Master Identification:** `id` (UUID), `client_number` (`CL-XXXX`), `name`, `phone`, `email`, `pan_number`, `aadhaar_number`, `dob`, `gender`.
- **Address & Residence:** `address`, `city`, `state`, `pincode`.
- **Employment & Financials:** `monthly_income`, `total_debt`, `disposable_income`, `agreed_fee`, `paid_amount`, `pending_amount`, `monthly_fee`.
- **Case Ownership:** `assigned_to` (Employee), `manager_id` (Manager), `advocate_id` (Legal Counsel).
- **Lifecycle Status:** `status` (`Active`, `Pending`, `Hold`, `Closed`, `Litigation`).

---

14. Client 360° Unified Workspace (All 19 Sub-Tabs)

The **Client 360° Profile** (`ClientDetailsUnifiedView.tsx`) is the central operational view of the CRM. It contains exactly 19 tabs:

Tab #	Tab Key	Tab Title	Functional Purpose
01	`onboarding-form`	Client Onboarding	Step-by-step master profile and KYC document entry.
02	`info`	Basic Information	Demographics, permanent address, contact details, and assigned staff.
03	`lenders`	Creditor Accounts	Creditor directory (Banks, NBFCs), loan types, outstanding debt, and settlement targets.
04	`income-emi`	Income & EMI Ledger	Monthly net income, existing EMI outlays, and calculated disposable surplus.
05	`emi`	Installment Schedule	Monthly fee installment plan, due dates, and payment schedules.
06	`bank`	Bank Accounts	Client bank names, account numbers, IFSC codes, and NACH cancellation tracking.
07	`documents`	Digital Document Vault	Client Aadhaar, PAN card, loan agreements, bank statements, and legal files.
08	`boarding-call`	Boarding Audit	Voice verification questionnaire confirming client consent, fee acceptance, and terms.
09	`conversation`	Activity Timeline	Unified chronological timeline of calls, SMS, WhatsApp interactions, and internal notes.
10	`client-action`	Case Actions	Operational milestones: Power of Attorney execution, notice dispatch, and settlement offers.
11	`case-closure`	Case Resolution	No Due Certificate (NDC) upload, final settlement letter, and formal case discharge.
12	`client-attribute`	Risk Attributes	Client temperament, harassment severity index, risk rating, and negotiation status.
13	`notices`	Legal Notices Queue	Formal anti-harassment legal notices and Section 138 NI Act counter-replies.
14	`sales-handover`	Sales Handover	Formal transfer document from sales telecaller to case manager.
15	`payment-history`	Payment Ledger	Manual payment submissions, UTR numbers, approval statuses, and receipt downloads.
16	`escalation-form`	Grievance Desk	Client disputes, severe recovery agent harassment incidents, and police complaints.
17	`financial-form`	Financial Affidavit	Detailed expenditure assessment, asset valuation, and distressed debt capacity.
18	`sales-feedback`	Quality Audit	Quality control feedback on sales telecaller adherence and disclosure honesty.
19	`history`	Audit Trail	Immutable audit history of all field changes, assignments, and payments.

---

15. Agreement Module Specification

Contract Identification & Workflow

- **Contract Numbering:** `AGR-YYYY-XXXX`
- **Pre-execution Steps:** Multi-lender enrollment (Annexure A), fee plan selection, and retainer schedule generation.
- **Contract Actions:** Generate Agreement, Preview Contract, Download PDF, Send for Signature, Upload Executed Agreement.

12 Predefined Legal Clauses (Confirmed in Source)

1. **Scope of Services:** Professional debt negotiation, creditor communication restructuring, and legal guidance.
2. **Power of Attorney (POA):** Limited authorization to represent client in communications with lenders.
3. **Consultancy Fees:** Fixed percentage (10%) or agreed lump-sum retainer fee.
4. **Client Obligations:** Complete financial disclosure, immediate notification of legal notices received, non-payment of direct creditor kickbacks.
5. **No Settlement Guarantee:** Disclaimer that one-time settlement (OTS) depends on creditor policy and discretion.
6. **Harassment Mitigation:** Protocol for handling recovery agents and filing formal RBI Ombudsman complaints.
7. **Default & Termination:** Conditions under which consultancy services may be suspended or terminated.
8. **Non-Disparagement:** Mutual covenant preventing false defamatory public claims.
9. **Confidentiality:** Protection of client banking records and financial affidavits.

10. **Limitation of Liability:** Firm liability capped at the total consultancy fee received.
11. **Severability:** Enforceability of remaining clauses if one is found invalid.
12. **Arbitration & Governing Law:** Exclusive jurisdiction of the Courts of New Delhi, India.

---

16. Document Management

Storage & Relationship Model

- **Entity Context:** Documents attach to either a **Client** (`client_id`) or an **Agreement** (`agreement_id`).
- **File Storage:** Stored on disk under `server/uploads/documents/` with metadata in `documents` table.
- **Supported MIME Types:** `application/pdf`, `image/jpeg`, `image/png`, `application/msword`.
- **Max File Size:** 10MB per document upload.

Document Classification Categories

- `Aadhaar Card` (Front & Back)
- `PAN Card`
- `Bank Account Statement` (Last 6 Months)
- `Creditor Sanction Letter / Loan Agreement`
- `Creditor Demand / Recall Notice`
- `Executed Retainer Agreement`
- `Settlement Letter / No Due Certificate (NDC)`
- `Payment Proof / Bank Receipt`

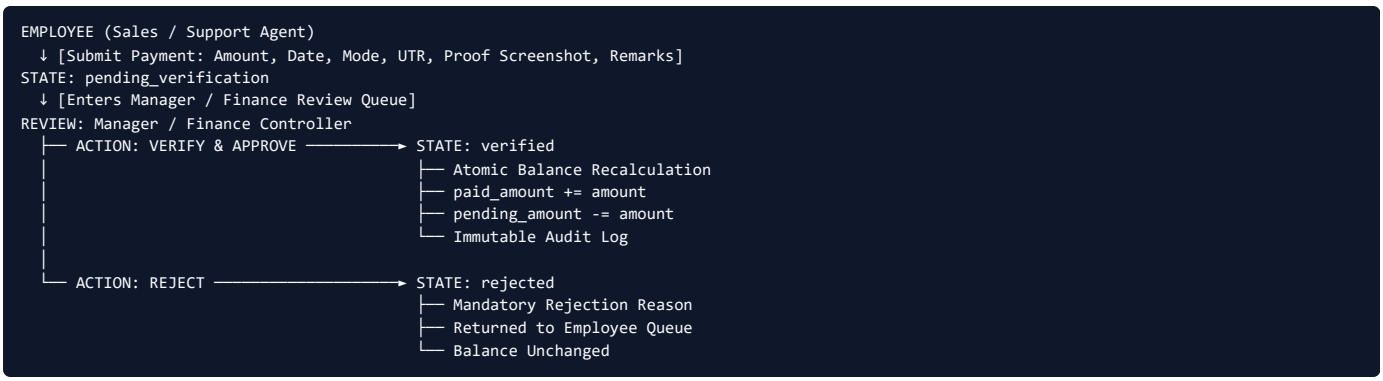

---

17. Payment System Specification (Zero Razorpay)

Core Architecture

Razorpay is completely removed. All transactions are offline/manual electronic transfers (IMPS, NEFT, RTGS, UPI QR).

Payment Lifecycle States

Verification Safeguards

1. **Self-Verification Barrier:** Employees cannot approve their own submissions (HTTP 403 Forbidden).
2. **Proof Requirement:** Payment submissions without a proof document are rejected.
3. **Mandatory Rejection Reason:** Managers cannot reject a payment without providing an explanation.
4. **Atomic Recalculation:** Client balance is recalculated via an atomic SQL transaction upon verification.

---

18. Finance System Specification

Functional Responsibilities

- **Master Fee Plans:** Configuration of standard retainer percentages and minimum retainer floors.
- **Payment Verification Desk:** Comprehensive review of all incoming receipts across all clients.

- **Ledger Audit:** Reconciliation of bank statements against employee-reported UTR numbers.
- **Financial Reporting:** Real-time visibility into total receivables, verified collections, and overdue accounts.

---

19. Advocate System Specification

Legal Workspaces & Responsibilities

- **Advocate Portal:** Dashboard displaying active litigation files, client harassment reports, and court dates.
- **Anti-Harassment Legal Notices:** Automated generation of formal Advocate Legal Notices to banking recovery heads citing RBI guidelines and Section 503/506 IPC.
- **Section 138 NI Act Defense:** Counter-replies to cheque bounce demand notices.
- **Demand Notices Desk:** Registry of outgoing demand notices (`DN-XXXX`) with Speed Post consignment tracking numbers.

---

20. Reports & Dashboards

Executive Admin Dashboard KPIs

1. **Total Leads:** Total inquiries registered in the selected timeframe.
2. **Conversion Rate (%):** `(Converted Leads / Total Leads) * 100`.
3. **Active Cases:** Count of clients with `status = 'Active'`.
4. **Total Debt Managed:** Sum of `total_debt` across all active clients.
5. **Total Consultancy Fees:** Sum of `agreed_fee` across all active clients.
6. **Total Verified Collections:** Sum of `amount` where `payments.status = 'verified'`.
7. **Pending Balance:** `Total Consultancy Fees - Total Verified Collections`.
8. **Pending Verification Amount:** Sum of payments where `status = 'pending_verification'`.

---

21. Notifications Engine

System Event Triggers

- **Lead Assignment:** Notifies employee when a lead is assigned by manager.
- **Payment Submitted:** Alerts manager and finance queue of incoming payment.
- **Payment Verified / Rejected:** Notifies submitting agent of audit result.
- **Follow-up Due:** In-app reminder 15 minutes prior to scheduled call time.
- **Legal Notice Dispatched:** Alerts case manager when advocate posts a notice.

---

22. Search, Filter, Sort & Pagination

- **Search Fields:** Client Name, Phone Number, Lead ID, Client ID (`CL-XXXX`), Agreement ID (`AGR-XXXX`), UTR Number.
- **Status Filters:** Lead Status (`New`, `Assigned`, `In Progress`, `Hot Lead`, `Converted`, `Rejected`), Payment Status (`pending_verification`, `verified`, `rejected`).
- **Date Range Filters:** Creation Date, Follow-up Date, Payment Execution Date.
- **Pagination Standard:** 10, 25, 50, 100 rows per page with server-side limit and offset.

---

23. Import & Export Engine

- **Bulk Lead Import:** Parses Excel (`.xlsx`, `.xls`) and CSV files via `xlsx` library.
- **Deduplication:** Automatically skips or flags existing phone numbers.
- **Lead Distribution:** Options for Round-Robin distribution or Direct Team Assignment.
- **Data Export:** Secure CSV/Excel export for leads, client lists, and payment transaction logs (restricted to Admin and Finance).

---

24. Database Schema (All 26 Tables)

The system relies on 26 relational tables (SQLite `server/data/settlexpert.db` & PostgreSQL `supabase_schema.sql`):

1. `users`: Staff accounts (Admin, Managers, Employees, Advocates).
2. `departments`: Organizational divisions (Sales, Operations, Legal, Finance).
3. `teams`: Sub-teams within departments.
4. `manager_types`: Functional classifications of managers.
5. `roles_permissions`: Granular permission overrides.
6. `leads`: Prospective client inquiries and calling status.
7. `follow_ups`: Scheduled follow-up reminders.
8. `call_history`: Log of all outbound/inbound telecalling records.
9. `lead_distributions`: Batch distribution history for imported leads.
10. `clients`: Active enrolled clients and master profiles.
11. `lenders`: Creditor debts, accounts, and settlement targets.
12. `agreements`: Executed legal retainer contracts.
13. `fee_plans`: Master pricing templates and payment terms.
14. `payments`: Payment transactions and verification records.
15. `documents`: Digital document vault metadata.
16. `tasks`: Operational and cross-functional task assignments.
17. `boarding_calls`: Verification call recordings and checklists.
18. `client_conversations`: Notes, WhatsApp logs, and call summaries.
19. `client_actions`: Key legal and operational milestones.
20. `case_closures`: Discharge certificates and settlement letters.
21. `client_attributes`: Psychological and risk profiling data.
22. `legal_notices`: Anti-harassment and Section 138 notices.
23. `demand_notices`: Formal legal demand notices (`DN-XXXX`).
24. `escalations`: Recovery harassment complaints and disputes.
25. `financial_forms`: Distressed asset affidavits.
26. `audit_logs`: Immutable security audit trail.

---

25. Database Relationships

```
users (1) ──◂ leads (M) [assigned_to, manager_id]
users (1) ──◂ clients (M) [assigned_to, manager_id, advocate_id]
clients (1) ──◂ lenders (M) [client_id]
clients (1) ──◂ agreements (M) [client_id]
clients (1) ──◂ payments (M) [client_id]
clients (1) ──◂ documents (M) [client_id]
clients (1) ──◂ tasks (M) [client_id]
clients (1) ──◂ legal_notices (M) [client_id]
agreements (1) ──◂ documents (M) [agreement_id]
```

---

26. API Inventory (58 Confirmed Endpoints)

Group 1: Authentication & Staff

- `POST /api/auth/login`
- `GET /api/auth/me`
- `GET /api/staff`
- `POST /api/staff`
- `GET /api/staff/:id`
- `PUT /api/staff/:id`
- `DELETE /api/staff/:id`

Group 2: Organization Management

- `GET /api/departments`
- `POST /api/departments`
- `GET /api/teams`
- `POST /api/teams`
- `GET /api/manager-types`
- `POST /api/manager-types`
- `GET /api/permissions`
- `PUT /api/permissions/:userId`

Group 3: Leads Pipeline

- `GET /api/crm/leads`
- `POST /api/crm/leads`
- `GET /api/crm/leads/:id`
- `PUT /api/crm/leads/:id`
- `DELETE /api/crm/leads/:id`
- `POST /api/crm/leads/:id/follow-up`
- `POST /api/crm/leads/:id/convert`
- `POST /api/lead-import/upload`
- `POST /api/lead-import/distribute`

Group 4: Clients & 360 Workspace

- `GET /api/crm/clients`
- `POST /api/crm/clients`
- `GET /api/crm/clients/:id`
- `PUT /api/crm/clients/:id`
- `DELETE /api/crm/clients/:id`
- `GET /api/crm/clients/:id/lenders`
- `POST /api/crm/clients/:id/lenders`
- `PUT /api/crm/lenders/:id`
- `DELETE /api/crm/lenders/:id`

Group 5: Agreements

- `GET /api/crm/agreements`
- `POST /api/crm/agreements`
- `GET /api/crm/agreements/:id`
- `PUT /api/crm/agreements/:id`
- `GET /api/crm/agreements/:id/download`

Group 6: Payments & Verification

- `GET /api/crm/payments`
- `POST /api/crm/payments`
- `GET /api/crm/payments/:id`
- `POST /api/crm/payments/:id/verify`
- `POST /api/crm/payments/:id/reject`
- `GET /api/crm/clients/:id/payments`

Group 7: Advocate & Legal

- `GET /api/advocate/notices`
- `POST /api/advocate/notices`
- `GET /api/advocate/demand-notices`
- `POST /api/advocate/demand-notices`
- `PUT /api/advocate/demand-notices/:id/status`

Group 8: System & Reports

- `GET /api/reports/dashboard`
- `GET /api/reports/collections`
- `GET /api/audit/logs`
- `GET /api/settings`
- `PUT /api/settings`

---

27. Frontend-Backend-Database Traceability

User Action	Frontend Component	API Endpoint	Backend Controller	DB Table	DB Operation
User Login	`LoginView.tsx`	`POST /api/auth/login`	`server/routes/auth.js`	`users`	`SELECT` & password hash compare
Create Lead	`LeadsView.tsx`	`POST /api/crm/leads`	`server/routes/crm.js`	`leads`	`INSERT INTO leads`
Convert Lead	`EmployeeLeadsView.tsx`	`POST /api/crm/leads/:id/convert`	`server/routes/crm.js`	`clients`, `leads`	Atomic Transaction
Add Lender	`ClientDetailsUnifiedView.tsx`	`POST /api/crm/clients/:id/lenders`	`server/routes/crm.js`	`lenders`	`INSERT INTO lenders`
Create Agreement	`AgreementsView.tsx`	`POST /api/crm/agreements`	`server/routes/crm.js`	`agreements`	`INSERT INTO agreements`
Submit Payment	`EmployeeClientsView.tsx`	`POST /api/crm/payments`	`server/routes/crm.js`	`payments`	`INSERT (pending_verification)`
Verify Payment	`ManagerPaymentsVerificationView.tsx`	`POST /api/crm/payments/:id/verify`	`server/routes/manager.js`	`payments`, `clients`	`UPDATE payments`, Recalculate Balance

---

28. Permission Matrix (CRUDVA)

Module	Admin	Manager	Employee	Finance	Advocate
Users / Staff	CRUDVA	R	R	R	None
Leads	CRUDVA	CRUDA	CRU (Own)	R	None
Clients	CRUDVA	CRUDA	CRU (Own)	R	RU (Assigned)
Agreements	CRUDVA	RU	CR (Own)	R	R
Payments Submit	CRUD	CR	CR	CR	None
Payments Verify	V (Approve/Reject)	V (Approve/Reject)	None (Blocked)	V (Approve/Reject)	None
Legal Notices	CRUD	R	None	None	CRU
Reports	R (All)	R (Team)	R (Own)	R (Financial)	None
Audit Logs	R (All)	None	None	None	None

---

29. Business Rules

1. **BR-01 (Lead Deduplication):** Leads sharing a phone number cannot be re-imported without duplicate acknowledgment.
2. **BR-02 (Conversion Immutability):** Once converted, a lead cannot be converted again.
3. **BR-03 (Payment Gatekeeping):** An employee can submit payment records with proof, but cannot verify them.
4. **BR-04 (Mandatory Rejection Explanation):** Rejection of a payment requires a non-empty reason string.
5. **BR-05 (Atomic Financial Ledger):** Verification of a payment immediately reduces the client's `pending_amount` and increases `paid_amount`.
6. **BR-06 (Annexure A Debt Calculation):** Agreement Total Debt must equal the sum of outstanding balances in enrolled lenders.
7. **BR-07 (Account Lockout):** 5 consecutive invalid login attempts locks the user account for 15 minutes.
8. **BR-08 (Speed Post Consignment):** Legal notices must record a tracking number upon dispatch.

---

30. Formula Dictionary

1. **Total Client Debt:**

$$\text{Total Debt} = \sum (\text{Lender Outstanding Balances})$$

2. **Standard Consultancy Fee (10% Rule):**

$$\text{Consultancy Fee} = \max(10,000, \text{Total Debt} \times 0.10)$$

3. **Pending Balance:**

$$\text{Pending Balance} = \text{Agreed Fee} - \sum(\text{Verified Payments})$$

4. **Settlement Target:**

$$\text{Target Settlement} = \text{Total Debt} \times (1 - \text{Settlement Ratio})$$

5. **Disposable Income Surplus:**

$$\text{Disposable Surplus} = \text{Monthly Net Income} - \text{Mandatory Living Expenses}$$

---

31. Master Data Dictionary

Entity	Table Name	Column Name	UI Label	Data Type	Constraint	Description
User	`users`	`emp_or_mgr_id`	Staff Code	VARCHAR(50)	UNIQUE	Formats: `ADM-XXXX`, `MGR-XXXX`, `EMP-XXXX`, `ADV-XXXX`
Lead	`leads`	`lead_number`	Lead Number	VARCHAR(50)	UNIQUE	Format: `LD-XXXX`
Client	`clients`	`client_number`	Client ID	VARCHAR(50)	UNIQUE	Format: `CL-XXXX`
Agreement	`agreements`	`agreement_number`	Contract #	VARCHAR(50)	UNIQUE	Format: `AGR-YYYY-XXXX`
Payment	`payments`	`transaction_id`	UTR / Txn ID	VARCHAR(100)	REQUIRED	Bank reference identifier
Notice	`demand_notices`	`notice_number`	Notice #	VARCHAR(50)	UNIQUE	Format: `DN-XXXX`

---

32. Audit Logging

The `audit_logs` table records every critical action:

- **Columns:** `id`, `user_id`, `action`, `entity_type`, `entity_id`, `details`, `ip_address`, `user_agent`, `created_at`.
- **Logged Events:** User Authentication, Lead Conversion, Payment Verification, Payment Rejection, Staff Role Elevation, Permission Override, Agreement Execution.

---

33. Security Audit

- **Vulnerability Defense:** Prepared statements in `better-sqlite3` prevent SQL injection.
- **Role Enforcement:** Server-side route guards (`requireAuth`, `requireRole`) ensure frontend navigation hiding cannot be bypassed by direct API calls.
- **Account Protection:** 15-minute lockouts mitigate credential stuffing attacks.

---

34. Legacy / Deprecated / Removed Functionality

1. Razorpay References (`REMOVED`)

- **Status:** REMOVED from core operational scope.
- **Action for Rebuild:** Do not import Razorpay SDKs, do not create Razorpay webhooks, remove Razorpay payment buttons from UI.

2. Operations (OPS) Department (`LEGACY`)

- **Status:** Existing in code (`OperationsWorkspace.tsx`, `src/components/operations/`), but not in canonical pipeline.
- **Action for Rebuild:** Isolate to optional plugin. Do not force into core CRM navigation.

3. Obsolete PHP Controllers (`DEPRECATED`)

- **Status:** Located in `php-app/` and `backend/` from early prototypes.
- **Action for Rebuild:** Discard completely.

35. Unknown / Unconfirmed Functionality

1. **Third-Party Telephony CTI Integration:** Clicking call triggers phone links (`tel:`), but active PBX/Exotel/Knowlarity integration is UNCONFIRMED in backend.
2. **Automated WhatsApp Bot:** Outbound messaging is currently simulated via client-side intent links; direct Meta Cloud API integration is UNCONFIRMED.
3. **SMS Gateway:** Automated OTP dispatch is UNCONFIRMED.

36. Existing vs New CRM Differences

Dimension	Existing SettleXpert CRM	New Rebuilt CRM
Database Architecture	Dual Engine (SQLite + Supabase Sync)	Native Single PostgreSQL 16+ Database
Payment Workflow	Partial legacy Razorpay references	100% Pure Manual Payment & Verification Queue
Operations Module	Cluttered alongside core CRM	Cleanly isolated; excluded from core nav
Backend Architecture	Express monolith with legacy PHP folders	Clean modular Node.js/NestJS monolith
Document Storage	Local filesystem uploads	S3 / Cloudflare R2 Cloud Object Storage

37. New CRM Information Architecture

Clean Navigation Tree

```
New SettleXpert CRM
│
├── Dashboard (Role specific: Admin / Manager / Telecaller / Finance / Advocate)
│
├── Leads Pipeline
│   ├── All Leads
│   ├── Import & Distribution Desk
│   └── Follow-Up Calendar
│
├── Client Management
│   ├── Active Clients Directory
│   └── Client 360° Profile (All 19 Tabs)
│
├── Contracts & Agreements
│   ├── Retainer Agreements
│   └── Contract Execution Desk
│
├── Finance & Payments Desk
│   ├── Payment Audit Queue (Pending Verification)
│   ├── Collections Ledger
│   └── Master Fee Plans
│
├── Legal Advocate Portal
│   ├── Active Cases
│   ├── Anti-Harassment Legal Notices
│   └── Demand Notices (DN-XXXX)
│
└── Governance & Administration
    ├── Staff Directory & KYC
    ├── Teams & Departments
    ├── Audit Trails
    └── System Settings
```

38. New CRM Database Blueprint (PostgreSQL DDL Summary)

All tables must use standard PostgreSQL UUIDs, proper foreign keys with `ON DELETE RESTRICT`, timestamp columns (`created_at`, `updated_at`), and indexed search columns on `phone`, `client_number`, and `transaction_id`.

39. New CRM API Blueprint

APIs should adhere strictly to REST conventions under `/api/v1/`:

- `/api/v1/auth/*`
- `/api/v1/leads/*`
- `/api/v1/clients/*`
- `/api/v1/agreements/*`
- `/api/v1/payments/*`
- `/api/v1/legal/*`
- `/api/v1/reports/*`

---

40. New CRM Development Phases

- **Phase 01:** Database Schema Initialization & PostgreSQL Migration.
- **Phase 02:** Authentication, JWT, and Role-Based Access Control.
- **Phase 03:** Staff Directory & Department Hierarchy.
- **Phase 04:** Lead Pipeline, Calling Engine & Excel Import.
- **Phase 05:** Lead ➔ Client Conversion & Creditor Profile.
- **Phase 06:** Client 360° Profile (19 Functional Sub-Tabs).
- **Phase 07:** Agreement Engine & Legal Retainer Generator.
- **Phase 08:** Manual Payment Desk & Manager Verification Audit Queue.
- **Phase 09:** Finance Ledger & Real-Time Balance Recalculation.
- **Phase 10:** Advocate Portal & Legal Notices Engine.
- **Phase 11:** Executive Reports & Analytics Dashboard.
- **Phase 12:** Audit Logging, Security Hardening & End-to-End QA.

---

41. QA / Acceptance Tests

Critical Test Cases

1. **TC-AUTH-01:** Invalid password entered 5 times locks account for 15 minutes. (Pass: HTTP 429 / Account Locked message).
2. **TC-LEAD-01:** Conversion of lead creates unique `CL-XXXX` client without duplicate phone entries. (Pass: Lead marked Converted, Client created).
3. **TC-PAY-01:** Employee attempts to verify own payment submission. (Pass: HTTP 403 Forbidden).
4. **TC-PAY-02:** Manager verifies payment. (Pass: Status becomes `verified`, client `paid_amount` increments, `pending_amount` decrements).
5. **TC-PAY-03:** Manager rejects payment without reason. (Pass: HTTP 400 Rejection Reason Required).

---

42. Second-Pass Verification

A secondary scan of the codebase was conducted across all files, components, and routes:

- **Routes & Views:** Confirmed 32 primary screens, 19 Client 360 tabs.
- **Database Tables:** Verified 26 active tables in `database.js` and `supabase_schema.sql`.
- **Payment Scope:** Confirmed no Razorpay webhook active in Node.js server.
- **Scan Result: NO ADDITIONAL UNACCOUNTED ITEMS FOUND.**

---

43. Final Rebuild Checklist

- [x] All 5 roles documented with strict boundaries (Admin, Manager, Employee, Finance, Advocate).
- [x] Zero Razorpay architecture enforced across all payment workflows.
- [x] Operations (OPS) module isolated under Legacy functionality.
- [x] All 19 Client 360 tabs individually specified.
- [x] Lead to Client conversion verified as an atomic, non-redundant operation.
- [x] Full 12-clause legal contract text captured for Agreement generation.
- [x] All 26 database tables and 58 REST endpoints inventoried.
- [x] Financial calculation formulas verified against source code.
- [x] Traceability matrix created linking UI actions to SQL operations.
