MASTER OPERATIONAL SPECIFICATION

SETTL EXPERT CRM

Complete Page-by-Page, Tab-by-Tab & Action Blueprint

Complete documentation covering all 4 Portals (Super Admin, Manager Work Center, Employee CRM, Advocate Legal Portal), Leads Pipeline, 19 Unified Client Sub-tabs, Agreements Engine, Legal Notices Engine, and Finance Collections.

Organization: SettleXpert Financial & Legal

Stack: React 19 + Express + SQLite / Supabase

Format: Master Technical PDF Export

Executive Architecture & Role Portals

Settl Expert CRM is an integrated debt settlement, recovery harassment mitigation, legal defense, and installment fee collections platform. The system coordinates four distinct user roles, each equipped with dedicated views, access boundaries, and operational tools:

User Role	Primary Workspace	Operational Responsibility
Super Admin	`AdminDashboard.tsx`	Full platform authority: Staff directory & KYC approvals, departments, teams, fee plans, payments verification, audit logs, and 1-click preview mode into all other roles.
Manager	`ManagerWorkspace.tsx`	Team oversight, lead distribution management, consultant calling audits, payment verification approvals, overdue follow-ups, and escalation handling.
Employee / Consultant	`EmployeeWorkspace.tsx`	Calling pipeline, lead qualification, follow-up scheduling, 19-tab client 360 profile, agreement drafting, and document collection.
Advocate / Legal	`AdvocateWorkspace.tsx`	Legal case file, creditor harassment notices, Section 138 NI Act replies, Demand Notices (DN), Speed Post tracking, and legal task management.

> **Dual Database Architecture:** The backend supports seamless failover between local high-speed `better-sqlite3` and centralized cloud-hosted `Supabase PostgreSQL` with sync queues (`syncQueue.js`) and two-way sync scripts.

1. Global Layout & Navigation Structure

1.1 Login & Security Screen (`LoginView.tsx`)

- **Input Fields:** Official Work Email, Password, Remember Me checkbox.
- **Security Logic:** Account lockout triggered after 5 consecutive failed login attempts (tracked in `users.failed_login_attempts` and `locked_until`).
- **JWT Auth:** Generates secure HTTP-only authorization token with payload containing `userId` , `role` , `departmentId` , `managerId` .
- **Auto Redirection:** Automatically routes users directly to their designated workspace according to role.

1.2 Top Header (`Header.tsx`)

- **Breadcrumb Navigator:** Displays active path (e.g., Organization > Staff Directory > KYC Details).
- **Admin Role-Preview Switcher:** Buttons visible exclusively to Super Admin: Advocate CRM Manager Panel Employee CRM
- **Live Notification Bell:** Triggers dropdown showing today's due EMI payments, overdue alerts, and urgent tasks.
- **User Profile Dropdown:** Profile picture, Name, Role badge, Fullscreen mode toggle, and Secure Logout.

1.3 Main Navigation Sidebar (`Sidebar.tsx`)

Navigation Group	Sub-Screens	Operational Purpose
Dashboard	Executive Overview	KPI widgets, revenue cards, conversion charts, pipeline counters.
Organization	Staff Directory & KYC, Managers, Employees, Departments, Teams, Manager Types, Roles & Permissions	Complete company hierarchy, staff KYC approval, and granular permission matrix.
CRM Management	Leads Pipeline, Lead Import & Distribution, Clients, Agreements, Client Onboarding Form	End-to-end sales lifecycle from fresh inquiries to signed agreements.
Advocates	Advocates Directory	Empaneled legal advocates, Bar Council IDs, case load allocation.
Finance & Accounts	Payments (Verification & Ledger), Fee Plans	Fee structures, payment receipts, manager verification, EMI records.
Operations & Legal	Tasks, Follow-ups Calendar, Documents, Escalations	Operational workflows, cross-department task queues, escalation tickets.
Reports & Audit	Reports & Analytics, Audit Trail	Performance analytics, conversion metrics, immutable user action logs.
Settings	Admin Settings	Branding, security rules, webhook integrations, system parameters.

2. CRM - Leads Pipeline & Smart Distribution

2.1 Leads View & Pipeline (`LeadsView.tsx` / `EmployeeLeadsView.tsx`)

The operational workspace where telecallers and settlement consultants manage, call, and qualify leads.

Status Filter Tabs

- `All` : Total leads in the agent's assigned pool.
- `New` : Freshly imported leads that have not been called yet.
- `Connected` : Call was successfully answered by customer.
- `Interested` : Customer actively seeking debt relief and settlement.
- `Follow-up` : Specific callback scheduled with date and time.
- `Converted` : Converted into active Client profile.
- `Not Interested / Dropped` : Customer declined or ineligible.

Table Columns & Data Fields

Column Name	Field Data Displayed	Interactive Capabilities
Lead # & Date	`lead_number` (e.g. LD-1042), Created timestamp	Click to open lead summary
Customer Details	Name, Phone number, Email, City, State	1-click phone call trigger, email copy
Financial Signals	Total Debt, Monthly Income, Creditor Banks	Visual badges on debt severity
Distress Attributes	Paying EMIs (Yes/No), Harassment Calls (Yes/No)	Highlights high-harassment emergency cases
Assignment	Assigned Telecaller / Employee & Manager	Manager can reassign lead
Status & Remark	Current pipeline status + Last follow-up note	Color-coded status badge
Actions	Follow-up, Edit Lead, Convert to Client, Create Agreement	Action buttons row

2.2 Lead Follow-Up Action Drawer

- **Follow-Up History:** Historical chronological table of all past calls (Date, Caller Name, Call Status, Interest Level, Remarks).
- **New Follow-up Submission:**
  - `Call Status` : Connected, Not Reachable, Busy, Switch Off, Wrong Number.
  - `Interest Level` : High, Medium, Low.
  - `Final Status` : Interested, Follow-up, Converted, Dropped.
  - `Next Follow-up Date & Time` : Integrated date-time picker.
  - `Detailed Remark` : Free text area for call notes.

2.3 18-Field Lead Edit Screen

Comprehensive qualification data: Name, Phone, Email, City, State, Address, Total Debt Range, Exact Debt, Monthly Income, Service Needed, EMI Status, Harassment Severity, Employment Status, Employment Type, Settlement Urgency, Consultation Timing, Credit Card Dues, Personal Loan Dues, Service Fee estimate.

2.4 Lead Import & Smart Distribution (`LeadImportDistributionView.tsx`)

- **Batch Excel/CSV Import:** Drag & drop file upload with client-side header mapping.
- **Deduplication Engine:** Automatically checks mobile numbers against existing leads and clients; segregates file into Valid Leads vs Duplicate Leads.
- **Distribution Engine:**
    - **Auto Round-Robin:** Equitably distributes imported batch among active agents.
    - **Custom Allocation:** Allows manager to specify exact quotas per agent.

3. CRM - Clients 360° Management & All 19 Sub-Tabs

3.1 Clients Directory View (`EmployeeClientsView.tsx`)

Primary operational directory for converted clients undergoing active settlement.

- **Filters:** Active Cases vs Closed Cases, Date Filter, Month Filter, Search by Client # / Name / Phone.
- **Table Columns:** Client # (`CL-XXXX`), Name, Phone, Total Debt, Settlement Target, Sx Services Fee, Fees Date, Fees Status, Case Status, Consultant, Action Buttons.
- **Action Buttons:** View 360 Details | Edit Client | Manage Lenders | View Agreement | Delete

3.2 Client 360° Unified View (`ClientDetailsUnifiedView.tsx`) - All 19 Tabs

#	Tab Identifier	Complete Tab Contents & Functional Scope
1	`onboarding-form` **Client Onboarding**	Complete multi-step onboarding document: Personal particulars, KYC details, income proof, bank statements, list of all default accounts, and client consent.
2	`info` **Profile & Debt Overview**	Client summary card: Contact details, permanent address, total debt enrolled, settlement target percentage, Sx service fee, current case status with instant dropdown update.
3	`lenders` **Creditors & Loans**	Table of all creditor banks/NBFCs (HDFC, ICICI, SBI, Bajaj, etc.). Fields: Bank Name, Loan Type, Outstanding Balance, Default Date, NPA Status, Statement upload. Add/delete lenders.
4	`income-emi` **Financial Assessment**	Monthly income vs fixed household expenditures (Rent, Food, School fees, Utilities, Medical). Calculates net disposable surplus available for settlement accumulation pool.
5	`emi` **EMI Schedule Tracker**	Monthly installment schedule from Month 1 to Month 12+. Displays Due Date, Expected Amount, Received Amount, Pending Balance, and Payment Status (Paid, Pending, Overdue).
6	`bank` **Bank & NACH Controls**	Client bank account details (Bank, A/C No, IFSC). Includes NACH / Auto-Debit Disablement Advisory tool to assist client in stopping auto-debits and avoiding bounce charges.
7	`documents` **Document Locker**	Digital repository for Aadhaar Card, PAN Card, Bank Statements, Loan Sanction Letters, and Legal Notices. File upload dropzone with preview and download options.
8	`boarding-call` **Welcome Call Verification**	Quality assurance verification form: Confirmation that client was briefed on settlement duration, anti-harassment call protocols, and installment terms. Uploads call audio/notes.
9	`conversation` **Communication Logs**	Interactive communication trail. Add timestamped notes categorized by Call, WhatsApp, Email, or Internal Staff Note with full conversational history.
10	`client-action` **Action Triggers**	Task scheduler: Schedule next touchpoint, assign task to legal advocate, flag for urgent creditor harassment response, or initiate loan restructure request.
11	`case-closure` **Case Closure & NDC**	Settlement completion desk: Upload Bank Settlement Letter, upload No Due Certificate (NDC), record final fee reconciliation, and update case status to Closed.
12	`client-attribute` **Risk Attributes**	Classification tags: Severe Harassment, Legal Threat Level, Police Complaint Risk, High Net-worth, Cooperative vs Unresponsive client ratings.
13	`notices` **Bank Legal Notices**	Registry of legal notices received from banks: Section 138 NI Act notices, Section 25 Payment Act notices, Arbitration summon notices, and Lok Adalat summons.
14	`sales-handover` **Consultant Handover**	Handover notes from Sales Consultant to Operations Team: Special commitments made, client emotional state, payment frequency promises, and verification signoff.
15	`payment-history` **Payment Ledger**	Complete chronological ledger of all payments received from client: Receipt Number, Amount, Payment Mode, Transaction Reference ID, Verification Date, and Verified By.
16	`escalation-form` **Escalation Desk**	Form to submit an urgent escalation ticket to Manager or Legal Head: Escalation Category, Severity (Critical, High, Normal), Incident Description, and Desired Outcome.

#	Tab Identifier	Complete Tab Contents & Functional Scope
17	`financial-form` **Distress Balance Sheet**	Comprehensive debt-to-income (DTI) evaluation, total liquid assets vs unsecured liabilities, and affordability index scoring.
18	`sales-feedback-form` **Client Feedback & CSAT**	Client satisfaction rating on sales transparency, fee clarity, response time, and consultation quality.
19	`history` **Audit Trail**	Full timestamped log of all edits, status transitions, advocate assignments, and notes updated for this specific client profile.

4. Agreements Engine & Advocate Legal Portal

4.1 Agreements Module (`AgreementsView.tsx` & `AgreementDocumentView.tsx`)

- **Lifecycle:** `draft` → `sent` → `signed` → `active` → `completed` / `cancelled` .
- **Document Generator:** Produces a formal legal agreement with:
  - Header with SettleXpert corporate registration, agreement number (`AGR-XXXX`), and execution date.
  - Party 1 (Settl Expert Services) & Party 2 (Client KYC, PAN, Address).
  - Recitals of financial insolvency and debt settlement representation.
  - Scope of Services: Direct creditor negotiation, harassment shielding, settlement conciliation.
  - Fee Schedule: Total Fee, Initial Retainer, Monthly Installment plan, Bank Escrow instructions.
  - Dual execution blocks with Authorized Signatory and Client Signature areas.

4.2 Advocate Legal Portal (`AdvocateWorkspace.tsx`)

Dedicated legal operations center for empaneled advocates and in-house legal counsel.

Portal Tab	Sub-Features & Modals	Output / Legal Impact
Advocate Dashboard	Active cases count, closed cases count, total debt under defense, recent client files table.	Operational overview of all legal cases.
Assigned Cases Directory	Search by client/phone/city, filter by Active vs Closed cases, view client debt profile, lenders list, and legal tasks.	Advocates access only cases assigned to them with zero cross-leakage.
Legal Notices Engine	Sequential ID: `LN-XXXX` . Tabs: All, Draft, Dispatched, Delivered. **Notice Types:** Anti-Harassment Notice, Reply to Bank Notice, Section 138 NI Act Reply, Arbitration Response. Fields: Bank Name, Loan A/C No, Notice Date, Speed Post Tracking No, Delivery Status.	Generates formal Advocate Letterhead Legal Notices ready for print and Speed Post dispatch.
Demand Notices Engine	Sequential ID: `DN-XXXX` . Counter-demand notices addressed to aggressive collection agencies disputing unlawful charges.	Official Demand Notice document with Speed Post tracking.
Legal Tasks	Task Title, Description, Priority (Urgent, High, Medium, Low), Due Date, Linked Client File.	Tracks court dates, reply deadlines, and police station representation.

5. Finance, Operations, Organization & Audit Logs

5.1 Finance & Payments (`PaymentsView.tsx`)

- **All Payments:** Chronological ledger of all collections across the company.
- **Payment Verification Queue:**
  - Lists payments submitted by agents with status `pending_verification`.
  - Displays Receipt #, Client Name, Amount, Transaction Reference ID, Payment Method, and Proof Attachment.
  - Actions: **Verify & Approve** (updates client ledger and reduces pending fee) or **Reject Payment** (requires rejection reason).
- **Monthly Collections & Due Alerts:**
  - Tracks installment collections (Month 1, Month 2, Month 3...).
  - Automatic notification banners for today's due payments and overdue accounts.
- **Fee Plans (`FeePlansView.tsx`):** Master fee structures (Duration in months, Base Fee, Installment counts).

5.2 Operations & Task Management (`OperationsView.tsx`)

- **Tasks:** Module-tagged tasks (Legal, CRM, Accounts, Operations) with priority-based grouping.
- **Follow-ups:** Organization-wide follow-up calendar displaying all scheduled touchpoints.
- **Documents:** Master document repository categorized by KYC, Bank Statements, Legal Notices, and Settlement Letters.
- **Escalations Desk:** Ticket resolution system for high-severity customer complaints and creditor harassment incidents.

5.3 Organization & Staff Directory (`StaffDirectory.tsx`)

- Staff Directory table filtering by Role (Admin, Manager, Employee, Advocate) and KYC Status.
- **KYC Verification Modal:** Displays Aadhaar Front, Aadhaar Back, Bar Council Registration, and approval/rejection controls.
- Departments, Teams, and Manager Types management views with assignment workflows.
- **Roles & Permissions Matrix (`RolesPermissionsView.tsx`):** Fine-grained permissions grid across 9 modules and 6 capabilities (view, create, edit, delete, assign, verify).

5.4 Activity / Audit Trail (`AuditLogsView.tsx`)

Immutable system audit logging tracking every transaction:

- Logged Fields: Timestamp, User ID, User Name, Role, Action (e.g. `Payment Verified`, `Lead Distributed`, `Case Closed`), Module, Record ID, IP Address, Device Browser.
- Searchable and filterable by date range and user.
